

Early Journal Content on JSTOR, Free to Anyone in the World

This article is one of nearly 500,000 scholarly works digitized and made freely available to everyone in the world by JSTOR.

Known as the Early Journal Content, this set of works include research articles, news, letters, and other writings published in more than 200 of the oldest leading academic journals. The works date from the mid-seventeenth to the early twentieth centuries.

We encourage people to read and share the Early Journal Content openly and to tell others that this resource exists. People may post this content online or redistribute in any way for non-commercial purposes.

Read more about Early Journal Content at <http://about.jstor.org/participate-jstor/individuals/early-journal-content>.

JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact support@jstor.org.

 DONATIONS

*Received by the American Philosophical Society, since the Publication
of Vol. VI, Part I, of their Transactions.*

FOR THE LIBRARY.

FOR THE CABINET.

From the Asiatic Society, The skeleton of an elephant.

FROM INDIVIDUALS.

- Brown (Samuel, M. D.) Specimens of earth and saltpetre rock, from a cave in Kentucky.—A cranium, tooth, and other bones found in that cave.—Bones of the head of a new animal.—Pure native saltpetre.—Gold and silver ore from Mexico.
 Barton (Wm.) An engraved portrait of Leonard Euler.

- Carey (Mathew) Materials from which he compiled the maps of his edition of Guthrie's Geography.
- Clifford (J. D.) Minerals, chiefly from the Island of Elba.
- Cloud (Joseph) Various minerals.—Zinc rolled under his direction.
- Davis (Dr.) A Chinese compass.
- Davy (John) Minerals and shells from Ava.
- Dearborn (Benjamin) A machine to compute interest.
- Dewitt (Simeon) A painting by E. Ames of the solar eclipse, 1806, when central near Albany.
- Durouchail (P.) Model of Homer's head, from a bust found in Egypt.—Proofs of engravings in wood, executed by him.
- Ferrer (J. J.) Silver ores and other minerals from Mexico.
- Fothergill (Anthony, M. D.) Specimens of—Otaheitian cloth.—British paper of cheap materials.—Minerals and earths, collected in the U. S.—Indian ornaments found near the Lehigh.
- Godon (S.) Minerals illustrating his *Memoir*, page 319, also, other minerals collected in the United States, &c.
- Haines (Engraver) Engraved portraits of Professors Rush & Barton.
- Hamilton (Talbot) Model of a Life Buoy, of his inven.—Medallion of Franklin cast in iron.—Mag. iron ore.—Various nat. pigments.
- Hassler (F. R.) A model of the glaciers of Swisserland.—Horns of the Chamois.—Models of chrystals; system of Romé de Lisle.
- Hembell (Wm.) Native sulphat of Magnesia, from Virginia.
- Hewson (T. T.—M. D.) Preparation of the eyes of a goose, exhibiting the membrane of aqueous humor.
- Hulings (Wm. E.) Marine shells from the mountains of Pennsylv.
- James (T. C.—M. D.) An engraved portrait of Richard Price, D. D.
- Jefferson (Thomas, President of the Society) 150 Roman bronze coins, from the reign of Augustus to that of Theodosius, a space of 400 years, sent to him by Weenweck, Sec'y. to the R. S. of Heraldry in Denmark, and by him to the Society.
- A horned lizard in a dormant state from Upper Louisiana.
- A Sonde de Mer, invented by Luisçius, Holland, 1805.
- Disinfecting apparatus of Guyton de Morveau.
- A skeleton head of the Maryland marmot, or aretomys-monax of Linnæus, found in a cave, in Virginia.
- Kinloch (Cleland) Marine shells from the high hills of Santee, S. C.
- Latimer (James) Gold and silver ore from South America.
- Lewis (Capt. M.) Specimens of plants, earths, seeds, and minerals, collected by him in his expedition from St. Louis up the Missouri to the Western Ocean, and back, 1804, 5, 6.
- Livingston (Robert R.) Volcanic minerals from Italy.
- Maclure (Wm.) A col. of minerals made in Europe & the U. States.

- Mease (James, M. D.) Specimens of lead ore from Perkiomen and of minerals from Ireland, collected by Donald Stuart, who collects for the Dublin Society.
- Mugford (Capt. Wm.) A model of his rudder, described in page 208 of this volume.
- Newell (Capt. Andrew) Some rare shells and corals from Sumatra.
- Partridge (Wm.) Specimens of copper ore from Perkiomen.
- Peyrouse (M.) An Indian earthen vase from Upper Louisiana.
- Pichon (L. A.) Disinfecting apparatus of Guyton de Morveau.
- Rogers (Maurice) Specimen of crude platina.
- Ross (Charles) Lava from the Isle of Ascension.
- Rivardi (Major) An Indian hatchet.
- Rose (Robert, M. D.) Minerals, coralines &c. from Niagara &c. and coal from seven counties of Pennsylvania.
- Sansom (Joseph) Two silver medals of Washington, one as Pres. of the U. States, one as Commander in Chief. Engraved by Reich.
- Smith (J. R.) A marble bust of Franklin, executed at Florence.
- Smith (R. Sec. of the Navy of the U. S.) A bronze medal of Comm. Preble. The die engraved by Reich, by order of Government.
- Traquair (A.) Two large specimens of slate from the Penn. quarry
- Tanner (Benj.) An engraved portrait of the R. R. Bishop White.
- Tarascon (L. A.) The lower jaw bone of the Mammoth.
- Vaughan (John) Specimens of native gold from Cabarrus county North Carolina, purer than the standard of the United States.
- Specimens of gypsum from Nova Scotia and France.
- Woodhouse (James, M. D. Late Professor of Chem. in the Univ. of Penn.) By Will,—His collection of minerals.
- Worthington (Thomas) Vitrified substance from an ancient Indian fort.—Chillicothe.

WEIGHTS AND MEASURES.

There are deposited in the Cabinet of the Society, by Mr. John Vaughan and by him purchased from Mr. F. R. Hassler (Mathematical Professor at the U. S. Military College, West Point, and a member of the Society.)

1. Exact copies of two French toises, made of small bars of iron. They have been compared with those sent by M. Lalande to Mr. Bird of London, on the occasion of the measurement of a degree in Maryland, by Mason and Dixon.

2. A toise of Canivet bearing the inscription "Toise de France étalonée le 26 Oct. 1768 a 16° de thermometre de Reaumur. On the back of this toise is marked the double length of a pendulum near the equator.

3. An exact French Mètre. It bears the general mark of the Committee of Weights and Measures; being examined by them.

4. A French Kylogramme, also examined by the Committee.
